BreezeBILLING

BreezeBILLING from Telrad is a carrier-class Authorization, Authentication and Accounting (AAA) solution for LTE networks of any size. Based on the robust open-source PostgreSQL database platform, it allows operators to scale smoothly to meet current and future subscriber growth.

Make billing a BREEZE with Telrad

Along with its best-in-class monitoring and redundancy capability, BreezeBILLING supports multiple payment gateways, graduated security roles as well as flexible cloud or on-premise configurations with rapid deployment. While network operators benefit from tailored billing processes and full-featured reporting, customers enjoy secure and convenient access to their account information via a user-friendly and intuitive online portal. Make billing a breeze with this cost-effective, highly customizable end-to-end solution!
